2. FUND MANAGER'S REPORT AND OUTLOOK

Fund Objective

The Cytonn Balanced Fund is a medium-risk fund that seeks to achieve a reasonable level of current income and offer investors long-term capital growth.

Portfolio Strategy

The fund seeks to outperform the weighted returns from both fixed-income instruments and the Equities listed in the Nairobi Securities Exchange. This is achieved by both optimizing asset allocation and security selection. The fund will therefore be invested in a diversified set of securities ranging from equities, fixed income, and collective investments schemes among others.

Portfolio Performance

The Cytonn Balanced Fund grew by 2.5% in November 2023. The loss was mainly driven by gains recorded by portfolio stocks such as Safaricom, KCB, and I&M Group of 12.9%, 7.7%, and 2.3%, respectively. The gain was however weighed down by losses recorded by portfolio stocks such as DTB-K of 2.3%.

Economic report and outlook

According to the Kenya National Bureau of Statistics (KNBS) Quarterly Gross Domestic Product Report Q2'2023, the Kenyan economy recorded a 5.4% expansion in Q2'2023, faster than the 5.2% growth recorded in Q2'2022. The growth was mainly supported by a rebound in the Agriculture, Fishing, and Forestry sector, which grew by 7.7% in Q2'2023 compared to a contraction of 2.4% in Q2'2022. The biggest gainer in terms of sectoral contribution to GDP was the financial and Insurance sector, increasing by 0.7% points to 9.6% in Q2'2023 from 8.9% in Q2'2022. In contrast, the Manufacturing sector was the biggest loser, declining by 0.3% points to 8.0% in Q2'2023, from 8.3% in Q2'2022. The Financial and Insurance sector recorded the highest growth rate in Q2'2023 growing by 13.5%, albeit slower than the 16.1% growth recorded in Q2'2022. Real Estate was the second largest contributor to GDP at 10.0% in Q2'2023, remaining relatively unchanged from Q2'2022, indicating sustained growth. Notably, the Real Estate sector grew by 5.8% in Q2'2023, 0.8% points higher than the 5.0% recorded in Q2'2022. We expect the economy to grow at a slower pace on the back of elevated inflationary pressures as well as the sustained depreciation of the Kenyan Shilling against the dollar which has resulted in reduced consumer purchasing power.

During the month, yields on the shorter-dated Government papers were on an upward trajectory, with the average yields on the 364-day, 182-day, and 91-day papers yields increasing by 28.8 bps, 36.8 bps, and 36.4 bps to 15.6%, 15.4%, and 15.4% respectively. Additionally, the Kenyan Shilling depreciated by 1.7% against the US Dollar to close the month at Kshs 153.2, from Kshs 150.6 recorded at the end of October 2023, largely attributable to increased dollar demand from energy and merchandise importers.

The November 2023 inflation rate eased marginally to 6.8% from the 6.9% recorded in the month of October 2023, marking the fifth consecutive month that the inflation has remained within the CBK target range of 2.5%-7.5%. During the month of November 2023, the equities market was on an upward trajectory, with NASI gaining the most by 3.8%, while NSE 20, NSE 25, and NSE 10 gained by 2.4%, 0.4%, and 0.2% respectively. The equities market performance was driven by gains recorded by large-cap stocks such as Bamburi, Safaricom, and KCB of 53.1%, 12.9%, and 7.7% respectively. The gains were, however, weighed down by losses recorded by large-cap stocks such as EABL, Stanbic, and Absa of 10.7%, 5.8%, and 3.9% respectively. The market closed the month trading at a price-to-earnings ratio (P/E) of 5.0x, 58.5% below the historical average of 12.1x, and a dividend yield of 9.4%, 5.0% points above the historical average of 4.4%.
